

**United Nations**  
Framework Convention on  
Climate Change

## How are stakeholders engaged on adaptation and on loss and damage under the UN climate regime, and how is knowledge management addressed?

Effective engagement of stakeholders and management of knowledge for adaptation is vital in supporting all adaptation activities at each step in the process. Under the [Cancun Adaptation Framework](#) (CAF), relevant multilateral, international, regional and national organizations, public and private sectors, civil society and other relevant stakeholders are invited to undertake and support enhanced action on adaptation at all levels. All adaptation components offer opportunities for Parties and stakeholders to engage. In particular, the [Nairobi Work Programme](#) (NWP) provides a platform for Parties and stakeholders from a range of organizations to collaborate on adaptation activities in various sectors, levels and regions, and to build and manage knowledge on adaptation. The [LDC Expert Group](#) (LEG), [Adaptation Committee](#) (AC) and NWP have developed many resources, including the [LDC portal](#), [online databases](#) and a range of [printed publications](#).
